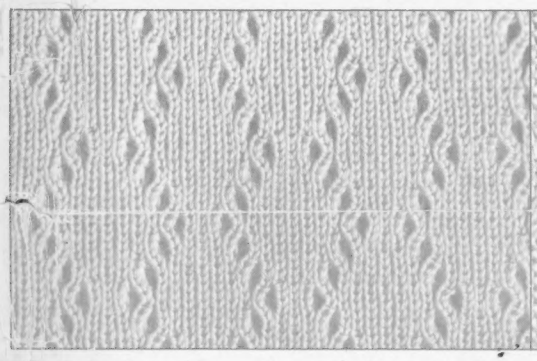
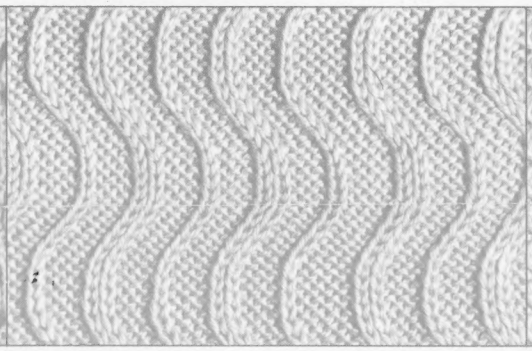
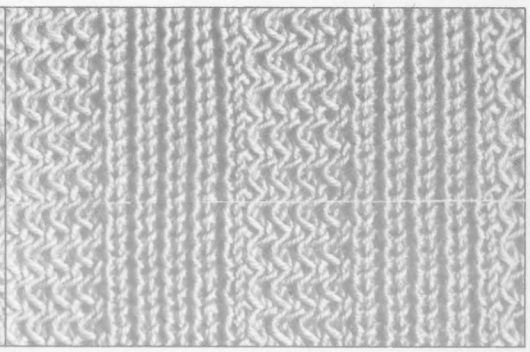
Because Knitting should be Fun



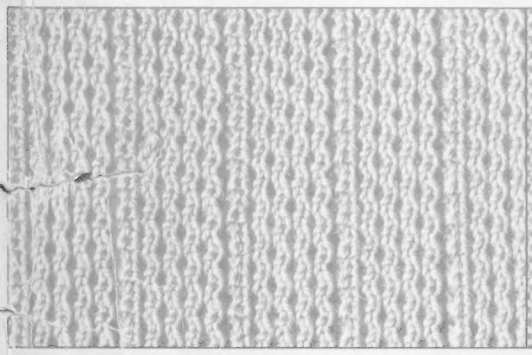
To knit the tucking pattern, simply choose the proper needle and pattern settings, and knit at the main carriage side. It's easy to vary the pattern by merely changing the needle setting. (See Empisal Pattern Book, No. 929, p. 215)



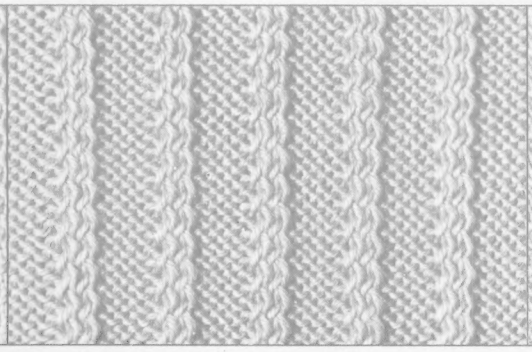
The "Sliding Pattern System", a main feature of the Empisal Rib Knitting Attachment, makes rib knitting a snap. The rib knitting attachment has 10 stitch pattern sliding system. (See No. 937, p. 217)



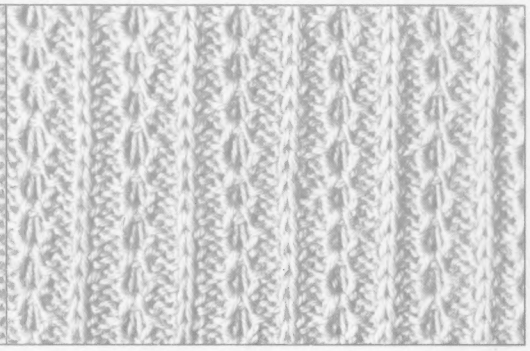
The "English Rib" is one of the most popular knitting patterns. The variation shown in the picture can be done by using the sliding pattern after every two rows of English rib. (See No. 942, p. 218)



This picture is a variation of the tucking pattern shown in picture 1. It is made by simply changing the needle arrangement for the original tucking pattern. (See No. 961, p. 223)



There is no need to limit your knitting to ordinary ribbing patterns. By changing the needle arrangement on the knitting machine or ribbing attachment, or by using the sliding pattern system, you can knit any number of fresh and interesting patterns. (See No. 953, p. 221)



The "Pull-up Stitch" knitting shown in the picture is typical of pattern variations that can be done with the ribbing attachment. This is a very suitable knitting for summer sweaters and other such garments. (See No. 948, p. 219)

Create your own style. Be your own fashion designer. As shown above, by varying the needle arrangements, changing the cam settings or using the sliding pattern system, you can knit countless stitch patterns. Let Empisal help you be original. Use the Empisal Pattern Book which contains more than 100 stylish and challenging patterns.
